Mr. Mills of course gives a warm support to the President's Mossage. What the President aptly defined as "a condition" Mr. Mills truly says "cannot remain." The surplus must be stopped by reducing the taxation that produces it.

STANDARD OIL BUCCANERING.

The business buccaneers known as the Standard Oil Trust never accomplished a more skilful feat of piracy than in wrecking the Greenwich Point Oil Refinery at Philadelphia and enforcing its recent sale to themselves at their own price. The detailed history of the concern's hope-

It is full time to clear the high seas of egitimate business of these unscrupulous buccaneers.

A POSTAL TELEGRAPH.

The Senate has voted to consider the subject of a postal telegraph, and Senator Cullon has given it a bill to consider.

It provides for new lines to connect all the principal cities in the country. The sum appropriated is \$4.000,000. The proposed rates are 10 cents for each twenty words and 5 cents for each additional ten under 500 miles, and an additional 5 cents for each 250 miles.

The spoils "lion in the way" is muzzled by a provision requiring all appointments to be made under the civil-service examination.

The subject deserves consideration. GIVE THE BOYS A SHOW.

Now comes forward an irate merchant who was hit by a stray ball, and who wants to abolish as a nuisance the royal sport the boys are having on Duane Street Park.

Many doubtless regard the boys themselves as a nuisance. But they are somewhat essential to the population. Baseball is essential to their happiness. And the Park Board is of it Ray's pension was increased from \$26 a month quite right in giving the youngsters a show in Duane Street Park.

Our advice to the irate merchant is to avoid passing that way or to learn to dodge.

THE ARREST OF IVES.

HENRY S. Ives, the financial Jack-in-the box, seems to be in a fair way to be suppressed at last. The lid of a criminal proce ration was slammed down upon him yesterday with a good deal of gusto.

Of course, he was "astonished." He had regarded all proceedings against himself in the mellow light of civil litigation. The shment of those who have followed his possifier financial operations is that a criminal nt was not served on him long ago.

LUXURIOUS NECESSITIES.

"Give me the luxuries of life," said a witty American author and diplomat, " and I will do without the necessities."

So thinks many a poor man of his tobacco. So think business men of the telephone.

The policy of the monopoly in treating these indispensable means of communication as "luxuries," is one that the Legislature should forbid.

An instrument that costs less than a dollar, and wires that must be strung over or under the people's streets, should not be permitted to become the means of extortion.

At last there are proofs of both Democratic and Republican simplicity in public servants. Among the items audited and allowed in the contingent expenses of the Senate are these; "Senator EDMUNDS, lunch, 10 cents; Senator SAULSBURY, dinner in Boston, 45 cents." No wonder there is a big surplus.

The people who prefer a dirty brown to a lively green as the color for the 2-cent postage stamps seem to be unaware that the present color is simply a reproduction of the tint of the old 3-cent stamps, which no esthete kicked against.

The Brooklyn mind-healers, in whose hands a patient has just died, complacently assert that there is no such thing as death. On this basis they seem to be building up quite a successful practice.

No Democrat who purposes to oppose the tariff reform policy of the Democratic party, as outlined in the President's Message, should be appointed Chairman of the Appropriations Committee.

The Republican Clubs may at least give the Democrats a pointer on the value of early

He Elucidates a Enetty Point in Anatomy m Nye, New York City.

DEAR SIR: Knowing the vast extent of your atsinments in the domain of natural science, and being myself an earnest seeker after truth in the meaning of the following sentence, which you will find at page 35, in chapter 3, of a book on "Comparative Anatomy and Physiology," by F. Jeffrey Bell, M. A., Professor at King's College:

"It happens to many gastruise that, their blasto pore closing up, they develop an investment of citia on their epiblast and swim about for a time freely in the water."

If you can shed any light upon the meaning of this sentence you will confer a favor upon.
Yours respectfully, James Kenson. Markeville, La., Nov. 7, 1887.

I understand the above perfectly well, but I do not know that I can make it clear to you through the medium of the press. I would much rather see you personally and expinin it to you. If I could take you into my laboratory for an hour or two I could give you a better idea than I can in a limited and have this matter setuled?

Gastrulm, as you know, are of two classes, vizmalignant and intermittent. It is the first class that is most likely to get their blastopore plugged up. Then trouble begins. Cilia begins to crupt on the epiblast and microbes break out all over the duplex. You can't be too careful about this. A blastopore, if I've got the right idea of what blastopore is, should be brought in every night or the boys may get hold of it and plug it before it is ripe. I would rather see an epiblast of mine, or a blastopore, or a gastrula for that matter, in its grave than mixed up with an investment of cilia

Young Mr. Cole said yesterday that he would be found at the Delavan House to-day week, and would at once nail up his sign and the name of the office he was seeking.

"I suppose," he remarked, "Gen. Husted will open up his headquarters a few days later. He will be kept busy from now until Friday week in prophesying that he will be the next Speaker."

"How does your canvass now stand?" young Mr. Cole was asked.

"I have now forty-five absolute pledges. I only need thirty-seven votes to control the caucus. Then there are at least eight members who are not pledged to me, but who will be for me as against Gen. Husted. While these eight men have not pledged themselves for me, they are solid against Gen. Husted."

"Is there any danger of some of your men getting away from you?"

"Not if written pledges and solemn verbal promises amount to anything."

"Gen. Husted is as confident as you are."

More Rhinestones Than Diamonds

(From a New Pork Letter.)
We don't see so many diamonds as we think lowadays. Rhinestones and paste are taking their places off as well as on the stage. There are numbers of women in New York known to possess jewels worth thousands of dollars, the cut, setting and appearance of which are perfectly familiar to society people, to thieves and to a great many people who cannot be reckoned in efter of these classes. These gems are a regular p-ri of the entertulnment gualantees to the purchaser of an operaticket, and the holder of the same would feel that implied contract had been violated if their wearers stayed at home or newlected to spread a travelling show-window over their velvet corsages in the great gold ca-ket of the auditorium, with its horseshoe curves of boxes full of the customary beach show of prize dames, damsels and beaux. And yet tiff gems—not the women—are frequently absent when we taink them there, I saw the fac simile of a pretty well-known dismend necklace at a jewelry counter a few days ago.

"All rhinestones," I was told. "There is a new method of cuting and mounting them which bring out greater brilliancy and makes it possible to dispense with the solid filling at the boxe, which used to distinguish the stones at once from real gems. These are after things to wear. They relieve the mind from anxiety about losing of the contents of their jewel cases made up in reinestones and the genuine articles locked away from danger in safe deposit vauits. It takes more than a casual examination to detect the difference, and so the poor thief has a hard time." jewels worth thousands of dollars, the cut, setting

Have You Got Spiral Silver Garters ?

[Annie Jennese Miller in Dress.]
Four years ago we very reluctantly gave up a pair of spiral wire garters, worn below the knee, which held our stockings perfectly smooth and did not interfere with perfect circulation, this spiral arrangement having no relation to the nerve and muscle-paralyzing clastic garter. But we were told anything worn around the leg was in the nature of a lighter and must be abandoused, so away went our comfortable and satisfactory spirals, while we plunged into a mild form of rioting in different styles of attachments recommended as "Improved

nd hygienic."
We were seeking truth in detail, and discou we were seaking truin in detail, and discomports only added to our road to find the right taking at last. One after another of these harnesses did we wear, until satisfied that none of them fulfilled the r-qu rements of a perfect stocking support. The stockings were held firmly? Yes; but every one of those attachments brought pressure to be remewhere where it ought not to be, causing the wearer not only bodily discomfort, but positive injury.

wearer not only bodily discomfort, but positive injury.

Our advice to women is to have a good substantial silver garter of the spiral pattern made, since the silver will wear for years and can always be kept bright and shining; and as the grir gives resally with each movement of the ier, is cool and light and brings to steady pre-sure upon any sensitive part. It is a great imp ovement over anything else we are familiar with, and our knowledge of supports is thorough and comprehensive.

The usher smiled and asked the wifeless gentlemen for his seat checks. These he had lost, and there was nothing left for the usher to do but chance it. He went up and down the aisles asking ladies if they had lost their husband, was met with indignant "Sirs!" and flashing eyes that implied even more, but, undeterred from his object, proceeded with his inquiries until he found the object of his and the bewildered husband's search. The meeting of the parted pair was most effusive and the husband, who was evinced less a new one, else he might have evinced less. A sample copy of a small matrimonial sheet called the Heart and Hand, fell into the hands of this susceptible Milford man four months ago. He read those "ads" setting forth in glowing terms the many prizes to be drawn by those matrimonally inclined. One in particular struck him:

effusive and the husband, who was evidently a new one, else he might have evinced less solicitude, could hardly thank the usher enough for his services in reuniting two fond and loving hearts.

It was a scene which was hugely enjoyed by those seated in the balcony and entirely overshadowed the performance on the stage for them.

It was short, to the point; and as a business man he admired it.

So did a retail clothier in Burlington.

Both men enclosed their business cards as proof that they were acting in the best of faith, and photographs of the loving Lily were asked in return.

A gushing letter was received by each in a few days, enclosed in which were finely finished photographs of a handsome young lady.

It has since been learned that the one the Milford man received was one of Ullie Akerstrom, the actress. The Milford man and the Burlington coat-fitter were alike charmed with the cardboard vision of grace, modesty and beauty, and opened at once a lively Worth Five Dollars a Thousand for USINESS instinct sometimes discovers a commercial value in seemingly worthless things. The New Hampshire man waited a month and then opened a correspondence with the manager of the private letter bureau in New York. He didn't get much consolation, but he succeeded in learning that he had been duped, but not alone. A letter, of inquiry about the same fascinating young lady had been received from the Vermont man, and the manager forwarded it to let him know how he had been duped.
